MEDICAL & HOSPITAL PRODUCTS

Your Partner in Global Healthcare

INTRODUCTION

Mercaderes de Arcadia SL presents its new range of hospital and healthcare products. Our catalogue offers practical, effective and professional solutions for hospitals, clinics and healthcare projects.
We work directly with qualified international manufacturers who provide the required certifications, permits and regulatory documentation for their products.

PRODUCT RANGE

Hospital Equipment & Furniture

- Hospital beds
- Medical furniture
- Bedside cabinets
- Medical carts and trolleys
- Patient care equipment

Surgical & Protective Products

- Surgical gowns
- Protective gowns and coveralls
- Surgical drapes
- Masks
- Caps and shoe covers

Medical Consumables

- Syringes and needles
- Infusion sets
- Gauze and dressings
- Medical packs
- Disposable medical supplies

Patient Care & Hygiene

- Disposable bed sheets
- Examination and couch rolls
- Underpads
- Towels and wipes
- Hygiene and protection products

QUALITY & COMPLIANCE

Products are sourced from international manufacturers with applicable certifications and regulatory documentation, including CE, ISO 13485, ISO 9001, ISO 14001 and other product-specific standards, depending on the manufacturer and product.

OUR APPROACH

International Manufacturers

Direct Sourcing

Project-Based Solutions

Mercaderes de Arcadia SL connects hospitals, clinics and healthcare projects with reliable international manufacturers, offering competitive sourcing, product selection and solutions adapted to each project's requirements.

INFUSION & INJECTION

IV Accessories

Small Components. Big Impact.

A comprehensive range of IV accessories designed for safe, efficient and reliable therapy.

Patient Safety
High-quality materials and reliable design to reduce infection risks.

Reliable Performance
Leak-resistant and secure connections.

Wide Variety
Multiple options to meet different clinical needs.

Easy Handling
Designed for simple and safe use.

Key Features

- Medical grade, non-toxic materials
- Compatible with standard luer connections
- Sterile and single use
- Various configurations available
- LATEX-FREE options
- EO sterilized
- Individual blister or PE pouch
- Shelf life: 5 years
- Standards: CE, ISO 13485

Three-Way Stopcocks
For flexible and safe infusion management. Various configurations and colours available.

Check Valves
Helps prevent backflow and ensures unidirectional flow.

Roller Clamps
Smooth and accurate flow control.

Y-Site Connectors
For multiple medication administration.

Luer Locks and Luer Slips
Secure and leak-resistant connections.

Injection Ports
For intermittent medication administration.

Air Vents with Bacterial Filter
Helps maintain a closed system and reduce the risk of contamination.

End Caps
For safe sealing of luer connections.

Infusion Accessories

Reliable Components for Safer Therapy.

A complete range of accessories to support efficient and safe infusion procedures.

Patient Safety
High-quality materials and secure connections to reduce infection risks.

Reliable Performance
Designed for consistent flow and dependable use.

Wide Compatibility
Compatible with standard luer connections and infusion systems.

Complete Range
Everything you need in one trusted source.

Applications

- IV therapy
- Drug administration
- Fluid and nutrition therapy
- Blood transfusion (selected products)
- Hospital and home care use
- Compatible with most standard systems

Extension Tubing
Various lengths available. With roller clamp for accurate flow control.

Drip Chambers
Transparent, with or without filter. Ensures visible flow and easy monitoring.

Injection Ports
Sterile, single-use. Different colours available for easy identification.

Roller Clamps
Smooth and precise flow control.

Three-Way Stopcocks
For flexible and safe infusion management. Multiple configurations available.

Luer Locks and Luer Slips
Secure and leak-resistant connections.

Bacterial Filters
Air vent and bacterial filters to help reduce the risk of contamination.

Disposable Syringes

Precision. Safety. Confidence.

A comprehensive range of sterile, single-use syringes designed for accurate dosages and safe medication administration.

Reliable in every application

Patient Safety
Sterile, non-toxic materials and smooth plunger action for safe and comfortable use.

Accurate Dosage
Clear barrel markings for precise measurement.

Wide Range
Multiple sizes and types to meet different clinical needs.

Reliable Quality
Manufactured under strict quality standards.
CE, ISO 13485.

General Specifications

Material	Medical grade PP (barrel and plunger)
Gasket	Latex-free, sterile rubber
Capacity	1 ml, 2 ml, 3 ml, 5 ml, 10 ml, 20 ml, 30 ml, 50 ml, 60 ml (and more)
Scale	Clear and accurate markings
Luer type	Luer Slip or Luer Lock
Sterilization	EO sterilized
Packaging	Individual blister pack or bulk pack
Shelf life	5 years
Standards	CE, ISO 13485

2-part Syringe (without needle)

- High transparency barrel.
- Smooth plunger movement.
- Clear and accurate scale.
- Available in multiple sizes (1 ml – 60 ml).

3-part Syringe (with rubber gasket)

- Better sealing and smoother action.
- Ideal for a wide range of clinical applications.
- Available in multiple sizes (1 ml – 60 ml).

Luer Lock Syringe

- Secure luer lock connection to prevent leakage.
- Suitable for high-pressure applications.
- Available in multiple sizes.

Insulin Syringe (with needle)

- Designed for accurate insulin dosage.
- Ultra-fine needle for patient comfort.
- Available in 0.3 ml, 0.5 ml and 1 ml.

Tuberculin Syringe (with needle)

- High precision for small volume injections.
- Clear and accurate scale.
- Available in 1 ml.

Safety Syringe (with safety mechanism)

- Built-in safety feature to reduce needlestick injuries.
- Easy one-hand activation.
- Available in multiple sizes.

Hypodermic Needles

Safety. Precision. Every Time.

A wide range of sterile, single-use hypodermic needles designed for safe and comfortable injections.

Small details make a big difference

Patient Safety
Sharp, siliconized needles for less pain and optimal penetration.

High Quality
Stainless steel, medical grade. Sterile and non-toxic.

Wide Range
Multiple sizes and gauges for different clinical needs.

Universal Use
Compatible with standard syringes and luer connections.

General Specifications

Material	Stainless steel (medical grade)
Hub	Medical grade PP (colour coded)
Gauge range	18G – 30G
Length range	13 mm – 50 mm (depending on size)
Bevel	Regular, short or ultra-thin wall
Sterilization	EO sterilized
Packaging	Individual blister pack or bulk pack
Shelf life	5 years
Standards	CE, ISO 13485

Standard Hypodermic Needles

- General injection use.
- Thin wall for smooth insertion.
- Colour coded by gauge.
- Available in multiple sizes.

Safety Hypodermic Needles

- With safety shield to reduce needlestick injuries.
- Easy one-hand activation.
- Available in various gauges and lengths.

Pen Needles

- Designed for insulin and other subcutaneous injections.
- Short, thin and comfortable.
- Available in multiple gauges (29G, 30G, 31G, 32G).

Filter Needles

- With integrated filter to reduce particulate matter.
- Ideal for reconstituting medications.
- Available in different gauges.

Blunt Fill Needles

- Blunt tip for safe transfer of fluids and medications.
- Reduces the risk of accidental needlestick injuries.
- Available in multiple sizes.

Needle Sets

- Combination with syringe for specific applications.
- Multiple configurations available.
- Sterile and single use.

Blood Collection Systems

Reliable Results. A Healthier Tomorrow.

A complete range of blood collection tubes and accessories designed for safe, efficient and accurate specimen collection, handling and transport.

Because every sample matters

Patient Safety
Sterile, high-quality materials to ensure safe and reliable specimen collection.

Accurate Results
Designed to maintain sample integrity and ensure reliable testing.

Wide Range
Multiple tube types and accessories for different clinical applications.

Trusted Quality
Manufactured under strict quality standards.
CE, ISO 13485.

General Specifications

Tube material	PET (medical grade)
Cap material	PE (colour coded)
Volume	1 ml – 10 ml (depending on type)
Additives	Various (see individual tubes)
Sterilization	EO sterilized
Packaging	Tray or individual pack
Shelf life	5 years
Standards	CE, ISO 13485

Serum Tube
(Clot Activator)

- For serum biochemical tests.
- Contains clot activator.
- Available in multiple sizes (3 ml, 5 ml, 10 ml).

Biochemistry Tube
(Serum Separator Gel)

- With clot activator and gel.
- Faster serum separation.
- Ideal for routine biochemistry.
- Available in multiple sizes.

Heparin Tube
(Lithium / Sodium Heparin)

- For plasma biochemical tests.
- Available in lithium or sodium heparin.
- Suitable for emergency and routine testing.

EDTA Tube
(K2 / K3)

- For haematology testing.
- Contains K2 or K3 EDTA.
- Preserves blood cell morphology.
- Available in multiple sizes.

Coagulation Tube
(Sodium Citrate)

- For coagulation tests (PT, APTT).
- 3.2% or 3.8% sodium citrate.
- Accurate blood-to-additive ratio.
- Available in multiple sizes.

ESR Tube
(ESR Sodium Citrate)

- For erythrocyte sedimentation rate testing.
- Pre-filled with sodium citrate.
- Standard 1.6 ml or 2.0 ml.
- Compatible with ESR analysers.

Glucose Tube
(Sodium Fluoride)

- Contains sodium fluoride and potassium oxalate.
- Preserves glucose stability.
- Ideal for glucose and lactate testing.
- Available in multiple sizes.

Accessories

- Butterfly blood collection sets.
- Tube holders (single and multiple).
- Needles and needle holders.
- Safety collection sets available.

IV Access & Safety Devices

Protection. Control. Peace of Mind.

A complete range of IV accessories designed to improve safety, reduce risks and support efficient clinical workflows.

Small devices Big impact

Enhanced Safety
Designed to reduce infection risks and prevent needlestick injuries.

Reliable Performance
Consistent flow and secure connections.

Easy to Use
User-friendly design for safe and quick handling.

Wide Compatibility
Compatible with standard luer systems and IV devices.

General Specifications

Material	Medical grade PC, PP or ABS
Sterilization	EO sterilized
Packaging	Individual blister pack or bulk pack
Shelf life	5 years
Standards	CE, ISO 13485

3-Way Stopcock

- Smooth and precise flow control.
- Secure luer connections.
- Available in different configurations and colours.

Extension Tube

- Provides extended reach for flexible use.
- Soft, kink-resistant tubing.
- Various lengths available (10 cm – 200 cm).

Luer Lock & Luer Slip Connector

- Secure and leak-free connection.
- Compatible with standard luer systems.
- Available in male and female versions.

Needle-free Connector

- Reduces risk of needlestick injuries.
- Easy one-hand operation.
- Positive or neutral pressure types available.

IV Flow Regulator

- Precise control of infusion flow.
- Easy to adjust.
- Suitable for gravity infusion systems.

Injection Port

- For intermittent medication administration.
- Self-sealing membrane.
- Minimizes contamination risk.

IV Filter

- Removes particles and air.
- Available in different pore sizes (0.2 µm, 1.2 µm, 5 µm).
- Transparent housing for easy inspection.

Tube Clamp

- Durable and easy to use.
- Provides quick and secure flow interruption.
- Available in different sizes and colours.

WOUND CARE & DRESSINGS

MEDICAL TAPES & FIXATION PRODUCTS

Secure. Gentle. Reliable.

A wide range of medical tapes and fixation products designed to keep dressings in place, provide secure fixation and ensure patient comfort, even for sensitive skin.

STRONG ADHESION
Keeps dressings secure

SKIN FRIENDLY
Gentle and breathable

MULTIPLE OPTIONS
For different clinical needs

Microporous Surgical Tape

- Breathable and comfortable
- Gentle on sensitive skin
- Strong adhesion
- Easy to tear
- Ideal for general fixation

Size (cm)	Color	Packaging
1.25 × 9.1	White	24 rolls/box
2.5 × 9.1	White	12 rolls/box
5 × 9.1	White	6 rolls/box

Transparent PE Tape

- Transparent and discreet
- Water-resistant
- Strong adhesion
- Easy to apply and remove
- Suitable for dressing fixation and device securing

Size (cm)	Color	Packaging
1.25 × 9.1	Transparent	24 rolls/box
2.5 × 9.1	Transparent	12 rolls/box
5 × 9.1	Transparent	6 rolls/box

Non-woven Adhesive Tape

- Soft and breathable
- High adhesion
- Conformable and flexible
- Painless removal
- Suitable for sensitive skin

Size (cm)	Color	Packaging
1.25 × 9.1	White	24 rolls/box
2.5 × 9.1	White	12 rolls/box
5 × 9.1	White	6 rolls/box

Silk Adhesive Tape

- Strong and durable
- Smooth surface
- Easy to tear
- Reliable fixation
- Widely used in hospitals and clinical care

Size (cm)	Color	Packaging
1.25 × 9.1	White	24 rolls/box
2.5 × 9.1	White	12 rolls/box
5 × 9.1	White	6 rolls/box

Elastic Cohesive Bandage

- Self-adhesive (no clips required)
- Flexible and comfortable
- Breathable and lightweight
- Sticks to itself, not to skin or hair
- Ideal for wound dressing fixation and support

15	4.5	Beige	12 rolls/pack

Tubular Bandage

- Seamless and elastic
- Comfortable and breathable
- Ideal for limb support and dressing retention
- Available in different sizes

Size	Suitable for	Packaging
S	Fingers / Child	10 pcs/box
M	Arm / Leg	10 pcs/box
L	Leg / Thigh	10 pcs/box
XL	Thigh / Body	10 pcs/box

Triangular Bandage

- Versatile and easy to use
- Ideal for arm sling, immobilisation and support
- Soft and breathable
- Individually packed

Size (cm)	Material	Packaging
90 × 90 × 127	Non-woven	1 pc/pouch
96 × 96 × 136	Cotton	1 pc/pouch

PBT Elastic Bandage

- High elasticity and durability
- Breathable and lightweight
- Maintains compression
- Suitable for sports and medical use

Size (cm)	Stretched Length (m)	Packaging
5	4.5	12 rolls/pack
7.5	4.5	12 rolls/pack
10	4.5	12 rolls/pack
15	4.5	12 rolls/pack

Plaster of Paris Bandage

- Fast setting
- High strength and stability
- Used for fracture immobilisation
- Easy to apply

Size (cm)	Setting Time	Packaging
5 × 300	2–4 min	12 rolls/box
7.5 × 400	2–4 min	12 rolls/pack
10 × 300	2–4 min	12 rolls/box
15 × 300	2–4 min	12 rolls/box

Compression Bandage

- Graduated compression
- Improves venous circulation
- Helps prevent swelling
- Suitable for post-operative and long-term use

Size (cm)	Compression Level	Packaging
8	Light / Medium	1 roll/box
10	Light / Medium	1 roll/box
12	Light / Medium	1 roll/box
15	Light / Medium	1 roll/box

Net Bandage

- Elastic and breathable
- Holds dressings in place without tape
- Comfortable and easy to use
- Available in different sizes

Size	Suitable for	Packaging
#1	Fingers	20 pcs/box
#2	Hand / Arm	20 pcs/box

WOUND CARE & DRESSINGS

ADVANCED WOUND DRESSINGS

Innovative solutions for better healing

A range of advanced dressings designed to manage different types of wounds, maintain an optimal healing environment and improve patient outcomes.

PROTECTS Supports the healing process

MAINTAINS Moist wound environment

IMPROVES Patient comfort and outcomes

Foam Dressings

- Highly absorbent
- Maintains a moist environment
- Soft and comfortable
- Suitable for moderate to heavily exuding wounds

Size (cm)	Packaging
5 × 5	10 pcs/box
10 × 10	10 pcs/box
10 × 20	10 pcs/box
15 × 15	10 pcs/box

Hydrogel Dressings

- Donates moisture to the wound
- Helps in autolytic debridement
- Soothes and cools
- Ideal for dry or necrotic wounds, including burns

Type	Size	Packaging
Gel (tube)	15 g	1 pc/box
Sheet	5 × 5	10 pcs/box
Sheet	10 × 10	10 pcs/box
Sheet	10 × 20	10 pcs/box

Hydrocolloid Dressings

- Creates a moist healing environment
- Absorbs exudate and forms a gel
- Protects against external contamination
- Suitable for mild to moderate exuding wounds

Size (cm)	Packaging
5 × 5	10 pcs/box
10 × 10	10 pcs/box
15 × 15	10 pcs/box
20 × 20	10 pcs/box

Alginate Dressings

- Highly absorbent natural fibres
- Ideal for moderate to heavily exuding wounds
- Helps control minor bleeding
- Conforms to the wound surface

Size (cm)	Packaging
5 × 5	10 pcs/box
10 × 10	10 pcs/box
10 × 20	10 pcs/box
15 × 15	10 pcs/box

BURN & SCAR CARE

Specialised care for sensitive skin

Products designed to manage burns, promote skin regeneration and improve the appearance of scars.

Burn Dressings

- Cools and soothes the skin
- Helps prevent infection
- Non-adherent and painless removal
- Suitable for partial and superficial burns

Size (cm)	Packaging
5 × 5	10 pcs/box
10 × 10	10 pcs/box
10 × 20	10 pcs/box
20 × 20	10 pcs/box

Silicone Scar Sheets

- Helps reduce the appearance of hypertrophic and keloid scars
- Soft, flexible and comfortable
- Reusable and easy to apply
- Suitable for post-surgical scars, burns and traumatic scars

Size (cm)	Packaging
4 × 10	5 pcs/box
5 × 15	5 pcs/box
10 × 15	5 pcs/box
Custom sizes	Available on request

Silicone Gel

- Helps soften and flatten scars
- Fast drying and non-greasy
- Suitable for new and existing scars
- Ideal for surgical, traumatic and burn scars

Size	Packaging
15 g (tube)	1 pc/box
30 g (tube)	1 pc/box
50 g (tube)	1 pc/box

Non-adherent Contact Layers

- Minimises pain and trauma on removal
- Allows exudate to pass through
- Protects the wound bed
- Ideal for burns, skin grafts and sensitive wounds

Size (cm)	Packaging
5 × 5	10 pcs/box
10 × 10	10 pcs/box
10 × 20	10 pcs/box

WOUND CARE & DRESSINGS

HEMOSTATIC & SPECIALTY DRESSINGS

Advanced solutions for challenging wounds

STOPS BLEEDING Helps control hemorrhage

PROTECTS Reduces infection risk

SUPPORTS HEALING Promotes better clinical outcomes

A specialised range of hemostatic, antimicrobial and non-adherent dressings designed to control bleeding, reduce the risk of infection and support optimal wound healing.

Hemostatic Gauze

- Rapid bleeding control
- Highly absorbent
- Easy to apply and remove
- Suitable for surgical, trauma and emergency use

Types	
Oxidized Regenerated Cellulose (ORC)	Available on request
Chitosan Gauze	Available on request
Kaolin Gauze	Available on request

Hemostatic Sponge

- Fast and effective hemostasis
- Absorbs large amounts of blood
- Flexible and easy to use
- Suitable for surgical and trauma wounds

Types	
Gelatin Sponge	Available on request
Collagen Sponge	Available on request
Chitosan Sponge	Available on request

Silver Antimicrobial Dressings

- Broad-spectrum antimicrobial protection
- Helps prevent infection
- Maintains a moist healing environment
- Suitable for acute and chronic wounds

Types	
Silver Foam	Available on request
Silver Alginate	Available on request
Silver Non-adherent	Available on request

Non-adherent Dressings

- Minimises trauma on removal
- Protects the wound bed
- Allows exudate to pass through
- Ideal for delicate and sensitive wounds

Types	
Paraffin Gauze	Available on request
Silicone Coated	Available on request
Tulle Dressings	Available on request

Hydrofiber Dressings

- High absorbency
- Locks exudate and bacteria
- Maintains a moist environment
- Conforms to the wound bed
- Suitable for moderate to heavily exuding wounds

Types	
Hydrofiber Pad	Available on request
Hydrofiber Ribbon	Available on request
Hydrofiber with Silver	Available on request

Negative Pressure Wound Therapy (Foam)

- Designed for NPWT systems
- Promotes granulation tissue

REHABILITATION & NURSING

PATIENT CARE & NURSING EQUIPMENT

Comfort in care. Support in every detail.

People in safe hands

A carefully selected range of equipment designed to support patient comfort, facilitate daily care and improve efficiency in hospitals, clinics, nursing homes and home care environments.

- **IMPROVES PATIENT COMFORT**
- **SUPPORTS CAREGIVERS**
- **SAFE AND RELIABLE SOLUTIONS**
- **SUITABLE FOR MULTIPLE CARE SETTINGS**

PATIENT CARE & NURSING EQUIPMENT

BEDSIDE FURNITURE & PATIENT SUPPORT

Practical solutions for everyday care.

A range of functional and reliable equipment designed to support patient comfort, facilitate daily care and improve efficiency in hospitals, clinics, nursing homes and home care environments.

- IMPROVES PATIENT COMFORT
- SUPPORTS SAFE CARE
- FUNCTIONAL AND DURABLE
- SUITABLE FOR MULTIPLE CARE SETTINGS

OVERBED TABLES

Adjustable and practical for daily use.

- Height adjustable
- Stable and durable structure
- Smooth and easy-to-clean surface
- Suitable for hospital, nursing home and home care

Type	Size	Packaging
Overbed Table	One size (adjustable)	1 pc/box

BEDSIDE CABINETS

Convenient storage at the bedside.

- Drawer and cupboard for personal items
- Durable and easy-to-clean materials
- Smooth and silent castors
- Practical design for patient rooms
- Suitable for hospitals, clinics and care facilities

Type	Size	Packaging
Bedside Cabinet	One size	1 pc/box

IV POLES & INFUSION STANDS

Reliable support for infusion therapy.

- Available with 2 or 4 hooks
- Height adjustable
- Stable and durable structure
- Easy to manoeuvre
- Suitable for hospitals, clinics and home care

Type	Size	Packaging
IV Pole	One size (adjustable)	1 pc/box

BED RAILS & ASSIST HANDLES

Added safety and support.

- Helps prevent falls
- Sturdy and reliable design
- Easy to install and use
- Suitable for hospital beds and home care beds

Type	Size	Packaging
Bed Rail / Assist Handle	Various sizes	1 pc/box

MEAL TABLES & CHAIRS

Comfortable and practical solutions.

- Designed for patient dining and daily activities
- Comfortable and ergonomic design
- Easy to clean and maintain
- Durable materials
- Suitable for hospitals, nursing homes and home care

Type	Size	Packaging
Meal Table / Chair	Various sizes	1 pc/box

UTILITY TROLLEYS

Organisation for better care.

- Multi-purpose use
- Durable stainless steel or coated options
- Easy to clean and maintain
- Smooth and silent castors
- Suitable for hospitals, clinics and care facilities

Type	Size	Packaging
Utility Trolley	Various sizes	1 pc/box

PATIENT CARE & NURSING EQUIPMENT

DAILY PATIENT CARE & HYGIENE AIDS

Dignity and comfort in everyday care.

Practical solutions to support personal hygiene, improve patient comfort and facilitate daily care in hospitals, clinics, nursing homes and home care environments.

BEDPAN

Practical and hygienic solution.

- Anatomical design for patient comfort
- Durable and easy to clean material
- Suitable for hospital, nursing home and home care use

Type	Size	Packaging
Bedpan	One size	1 pc/box

URINAL BOTTLES

For male and female use.

- Available in male and female models
- Leak-resistant design
- Easy to use and clean
- Suitable for hospital, nursing home and home care use

Type	Size	Packaging
Male Urinal / Female Urinal	One size	1 pc/box

SHAMPOO BASIN

Comfortable hair washing for bedridden patients.

- Designed for easy and comfortable hair washing
- Soft and ergonomic structure
- With drainage hose
- Suitable for hospital, nursing home and home care use

Type	Size	Packaging
Shampoo Basin	One size	1 pc/box

WASH BASIN

Versatile and durable.

- Multipurpose use (personal care, hygiene, washing)
- Durable and easy to clean material
- Lightweight and practical
- Suitable for hospital, nursing home and home care use

Type	Size	Packaging
Wash Basin	Various sizes	1 pc/box

OXYGEN THERAPY & MEDICAL GAS

MEDICAL GAS SUPPLY SYSTEMS

STATIONARY

OXYGEN GENERATOR SYSTEM

On-site oxygen production for a safer, more efficient and self-sufficient hospital.

The stationary oxygen generator system produces medical oxygen on-site from ambient air, using PSA (Pressure Swing Adsorption) technology, providing a stable, continuous and cost-effective supply for hospitals and healthcare facilities.

It is an ideal solution to reduce dependence on cylinder supply, ensure uninterrupted oxygen availability and improve operational efficiency.

RELIABLE SUPPLY
Continuous on-site oxygen production

COST EFFICIENT
Reduces cylinder logistics and costs

HIGH PURITY
Complies with medical oxygen standards

SUSTAINABLE
Uses ambient air, low environmental impact

OXYGEN THERAPY & MEDICAL GAS

OXYGEN REGULATORS & FLOWMETERS

Reliable control for safe and effective oxygen therapy.

A selection of regulators and flowmeters designed for hospital, clinical and home care use, ensuring accurate flow delivery and patient safety.

OXYGEN PRESSURE REGULATOR

Reliable and precise control.

- Designed for medical oxygen use
- Stable pressure output
- Durable and reliable construction
- Suitable for hospital, clinical and home care use

Type	Gas	Inlet Connection	Packaging
Pressure Regulator	Oxygen (O_2)	Standard (according to model)	1 pc/box

OXYGEN FLOWMETER

Accurate flow delivery.

- Clear and easy-to-read scale
- Smooth and accurate flow adjustment
- With or without humidifier bottle (according to model)
- Suitable for hospital, clinical and home care use

Type	Gas	Flow Range	Packaging
Flowmeter (with humidifier)	Oxygen (O_2)	According to model	1 pc/box

OXYGEN HUMIDIFIER BOTTLE

Comfortable and safe humidification.

- Provides optimal humidification for oxygen therapy
- Clear level markings
- Durable and easy to clean
- Suitable for hospital, clinical and home care use

Type	Material	Capacity	Packaging
Humidifier Bottle	PC (Polycarbonate)	According to model	1 pc/box

OXYGEN THERAPY ACCESSORIES

Essential accessories for a complete solution.

- Nasal cannulas and oxygen masks
- Oxygen extension tubing
- Available in different types and configurations
- Suitable for hospital, clinical and home care use

Type	Description	Packaging
Nasal Cannula	Adult / Paediatric (according to model)	1 pc/bag
Oxygen Mask	Adult / Peadiatric (according to model)	1 pc/bag

OXYGEN THERAPY & MEDICAL GAS

MEDICAL GAS OUTLETS & VACUUM REGULATOR

Reliable connections for a safer environment.

A range of medical gas outlets and vacuum regulators designed for hospital, clinical and long-term care facilities, ensuring safe, efficient and continuous supply of medical gases.

MEDICAL GAS OUTLET

Safe and standardised gas supply.

- Suitable for oxygen, air, vacuum and other medical gases
- Standardised connection
- Reliable and durable design
- Easy installation and maintenance
- Suitable for hospitals, clinics and healthcare facilities

OXYGEN FLOWMETER WITH HUMIDIFIER

Accurate flow control with humidification.

- Precise and easy flow adjustment
- Clear and easy-to-read scale
- With humidifier bottle
- Provides comfortable and effective oxygen therapy
- Reliable and durable design
- Suitable for hospital, clinical and home care use

VACUUM REGULATOR

Stable and reliable vacuum control.

- Accurate vacuum regulation
- Clear pressure indication
- Stable performance
- Durable and reliable design
- Suitable for hospital, clinical and healthcare facilities

HUMIDIFIER BOTTLE (OPTIONAL ACCESSORY)

For use with medical gas flowmeters.

- Provides optimal humidification
- Clear level markings
- Durable and easy to clean
- Designed for use with oxygen flowmeters
- Suitable for hospital, clinical and home care use

OXYGEN THERAPY & MEDICAL GAS

MEDICAL GAS OUTLETS

Standardised. Safe. Reliable.

A range of medical gas outlets for oxygen, air, vacuum and other medical gases, designed for hospital, clinical and long-term care facilities, ensuring safe and efficient distribution.

OXYGEN OUTLET

For oxygen (O_2) supply.

- Standardised connection
- Safe and reliable design
- Durable and long service life
- Easy installation and maintenance

Type	Gas	Standard	Panel Colour
Medical Gas Outlet	Oxygen (O_2)	According to model	Green

MEDICAL AIR OUTLET

For medical air supply.

- Standardised connection
- Safe and reliable design
- Durable and long service life
- Easy installation and maintenance

Type	Gas	Standard	Panel Colour
Medical Gas Outlet	Medical Air	According to model	Yellow

VACUUM OUTLET

For vacuum supply.

- Standardised connection
- Safe and reliable design
- Durable and long service life
- Easy installation and maintenance

Type	Gas	Standard	Panel Colour
Medical Gas Outlet	Vacuum	According to model	White

NITROUS OXIDE OUTLET

For nitrous oxide (N_2O) supply.

- Standardised connection
- Safe and reliable design
- Durable and long service life
- Easy installation and maintenance

Type	Gas	Standard	Panel Colour
Medical Gas Outlet	Nitrous Oxide (N_2O)	According to model	Blue

CARBON DIOXIDE OUTLET

For carbon dioxide (CO_2) supply.

- Standardised connection
- Safe and reliable design
- Durable and long service life
- Easy installation and maintenance

Type	Gas	Standard	Panel Colour
Medical Gas Outlet	Carbon Dioxide (CO_2)	According to model	Grey

AGSS OUTLET

For Anaesthetic Gas Scavenging System.

- Standardised connection
- Safe and reliable design
- Durable and long service life
- Easy installation and maintenance

Type	Gas	Standard	Panel Colour
Medical Gas Outlet	AGSS	According to model	Purple

OXYGEN THERAPY & MEDICAL GAS

FLOWMETERS & PRESSURE REGULATORS

Accurate control for effective oxygen therapy.

A range of flowmeters and pressure regulators designed for medical oxygen, air and other medical gases, ensuring accurate flow delivery and stable pressure control in hospital, clinical and home care settings.

OXYGEN FLOWMETER WITH HUMIDIFIER

For oxygen therapy.

- Accurate and stable flow control
- Clear and easy-to-read scale
- With humidifier bottle
- Durable and reliable design
- Suitable for hospital, clinical and home care use

Type	Gas	Flow Range	Humidifier	Packaging
Flowmeter with Humidifer	Oxygen (O_2)	According to model	Included	1 pc/box

OXYGEN FLOWMETER (WITHOUT HUMIDIFIER)

For oxygen therapy.

- Accurate and stable flow control
- Clear and easy-to-read scale
- Compact and lightweight
- Durable and reliable design
- Suitable for hospital, clinical and home care use

Type	Gas	Flow Range	Packaging
Flowmeter (without humidifier)	Oxygen (O_2)	According to model	1 pc/box

AIR FLOWMETER WITH HUMIDIFIER

For medical air supply.

- Accurate and stable flow control
- Clear and easy-to-read scale
- With humidifier bottle
- Durable and reliable design
- Suitable for hospital, clinical and home care use

Type	Gas	Flow Range	Humidifier	Packaging
Flowmeter with Humidifer	Medical Air	According to model	Included	1 pc/box

OXYGEN PRESSURE REGULATOR

Reliable and precise control.

- Accurate pressure control
- Clear pressure indication
- Stable and reliable performance
- Durable and long service life
- Suitable for hospital, clinical and home care use

Type	Gas	Inlet Connection	Packaging
Pressure Regulator	Oxygen (O_2)	According to model	1 pc/box

AIR PRESSURE REGULATOR

Reliable and precise control.

- Accurate pressure control
- Clear pressure indication
- Stable and reliable performance
- Durable and long service life
- Suitable for hospital, clinical and home care use

Type	Gas	Inlet Connection	Packaging
Pressure Regulator	Medical Air	According to model	1 pc/box

VACUUM REGULATOR

Stable and reliable vacuum control.

- Accurate vacuum regulation
- Clear pressure indication
- Stable performance
- Durable and reliable design
- Suitable for hospital, clinical and home care use

Type	Gas	Inlet Connection	Packaging
Vacuum Regulator	Vacuum	According to model	1 pc/box

OXYGEN THERAPY & MEDICAL GAS

GAS MANIFOLDS AND SUPPLY SYSTEMS

Continuous supply. Maximum safety.

Manifolds and supply systems designed to ensure a continuous, reliable and safe supply of medical gases in hospitals, clinics and healthcare facilities.

OXYGEN MANIFOLD

Automatic and reliable supply.

- Automatic changeover system
- Ensures continuous oxygen supply
- High safety and reliability
- Suitable for hospitals and large facilities

Type	Gas	Cylinders	Operation
Manifold	Oxygen (O_2)	According to model	Automatic

MEDICAL AIR MANIFOLD

Stable supply for medical air.

- Automatic changeover system
- Ensures continuous medical air supply
- High safety and reliability
- Suitable for hospitals and large facilities

Type	Gas	Cylinders	Operation
Manifold	Medical Air	According to model	Automatic

NITROUS OXIDE MANIFOLD

Continuous and safe supply.

- Automatic changeover system
- Ensures continuous N_2O supply
- High safety and reliability
- Suitable for hospitals and large facilities

Type	Gas	Cylinders	Operation
Manifold	Nitrous Oxide (N_2O)	According to model	Automatic

CARBON DIOXIDE MANIFOLD

Reliable supply for CO_2.

- Automatic changeover system
- Ensures continuous CO_2 supply
- High safety and reliability
- Suitable for hospitals and large facilities

Type	Gas	Cylinders	Operation
Manifold	Carbon Dioxide (CO_2)	According to model	Automatic

VACUUM MANIFOLD SYSTEM

Stable vacuum supply.

- Automatic changeover system
- Ensures continuous vacuum supply
- High efficiency and reliability
- Suitable for hospitals and large facilities

Type	Gas	Pumps	Operation
Vacuum Manifold	Vacuum	According to model	Automatic

ALARM BOX (OPTIONAL)

Monitoring for greater safety.

- Real-time pressure monitoring
- Visual and audible alarms
- For oxygen, medical air, vacuum and other gases
- Suitable for hospitals, clinics and healthcare facilities

Type	Function	Gas
Alarm Box	Pressure monitoring and alarm	O_2 / Air / Vacuum (according to model)

Safe supply. Better care.

OXYGEN THERAPY & MEDICAL GAS

GAS CONTROL AND SAFETY DEVICES

Reliable systems for continuous and safe supply.

A range of control, safety and distribution devices designed to ensure the stable and safe operation of medical gas systems in hospitals, clinics and healthcare facilities.

ZONE VALVE BOX

Isolation and control by area.

- Isolates gas supply by area
- Facilitates maintenance and safety
- Clear identification of each gas
- Suitable for hospitals and large facilities

Type	Gas	Function	Installation
Zone Valve Box	O_2 / Air / Vacuum	Isolation and control	Wall mounted or recessed

AREA ALARM BOX

Real-time monitoring for greater safety.

- Continuous pressure monitoring
- Visual and audible alarms
- For oxygen, medical air, vacuum and other gases
- Increases safety in hospital installations

Type	Gas	Function	Installation
Area Alarm Box	O_2 / Air / Vacuum	Pressure monitoring and alarm	Wall mounted

PIPELINE PRESSURE SWITCH

Automatic control and protection.

- Monitors pipeline pressure
- Automatic control and alarm signal
- Reliable and durable design
- Suitable for medical gas systems

Type	Adjustable Range	Function	Connection
Pressure Switch	According to model	Pressure control and alarm	Threaded

PRESSURE RELIEF VALVE

Safety in every installation.

- Automatically releases excess pressure
- Protects the pipeline system
- Reliable and durable design
- Suitable for oxygen, air, vacuum and other gases

Type	Gas	Function	Connection
Safety Valve	O_2 / Air / Vacuum	Pressure relief	Threaded

CHECK VALVE

Prevents reverse flow.

- Prevents reverse flow of gas
- Ensures safe and stable operation
- Durable and reliable design
- Suitable for medical gas pipelines

Type	Gas	Function	Connection
Check Valve	O_2 / Air / Vacuum	Prevents reverse flow	Threaded

GAS FILTER

Clean supply for better performance.

- Filters particles and impurities
- Improves gas quality
- Durable and high performance design
- Suitable for medical gas systems

Type	Gas	Function	Connection
Gas Filter	O_2 / Air / Vacuum	Filtration of particles	Threaded

TERMINAL UNITS AND BEDHEADS

Practical. Safe. Patient-centred.

Terminal units, bedhead units and ceiling pendants designed to provide a safe, convenient and efficient access to medical gases, electrical power and communication services in hospitals and healthcare facilities.

HORIZONTAL BEDHEAD UNIT

Integrated solutions for patient care.

- Modern and functional design
- Integrated medical gas, electrical and communication outlets
- Built-in lighting (optional)
- Durable and easy to clean
- Suitable for hospital wards and ICU

Type	Gas	Length	Installation
Horizontal Bedhead Unit	O_2 / Air / Vacuum	According to model	Wall mounted

VERTICAL BEDHEAD UNIT

Compact and space-saving design.

- Vertical configuration
- Medical gas and electrical outlets
- Space-saving and flexible installation
- Durable and reliable structure
- Suitable for ICU, emergency and wards

Type	Gas	Height	Installation
Vertical Bedhead Unit	O_2 / Air / Vacuum	According to model	Wall mounted

CEILING PENDANT

Flexible and efficient workplace.

- Flexible positioning
- Medical gas, electrical and data outlets
- Ergonomic design
- Improve workflow and patient care
- Suitable for ICU, operating room and critical areas

Type	Gas	Configuration	Installation
Ceiling Pendant	O_2 / Air / Vacuum	According to model	Ceiling mounted

MEDICAL COLUMN

Versatile solutions for clinical areas.

- Compact and robust design
- Multiple outlet configurations
- Easy installation and maintenance
- Suitable for wards, ICU and operating rooms

Type	Gas	Configuration	Installation
Medical Column	O_2 / Air / Vacuum	According to model	Floor or ceiling mounted

PENDANT ACCESSORIES

Complete accessories for your needs.

- Shelves and drawers
- IV poles and instrument holders
- Baskets and trays
- Monitor arms and equipment rails
- Customised configurations available

Type	Material	Application
Accessory	Stainless steel / Aluminium	For bedheads, columns and pendants

CUSTOM SOLUTIONS

Tailored to your project.

- Different configurations and finishes
- Adapted to your hospital project
- Reliable and durable design
- Compatible with international standards
- Support and technical advice

Type	Gas	Finish	Installation
Custom Solution	O_2 / Air / Vacuum	According to project	Wall, floor or ceiling mounted

Better care spaces. Better lives.

OXYGEN THERAPY & MEDICAL GAS

MEDICAL GAS GENERATORS AND FILLING SOLUTIONS

On-site supply. Greater independence.

Reliable and efficient solutions for the generation, compression, storage and filling of medical gases, designed to meet the needs of hospitals, clinics and healthcare facilities.

MEDICAL OXYGEN GENERATOR

Reliable on-site oxygen supply.

- High purity medical oxygen (up to 93% ±3)
- PSA (Pressure Swing Adsorption) technology
- Automatic and continuous operation
- Suitable for hospitals, clinics and large facilities

Type	Oxygen Purity	Capacity	Operation
Oxygen Generator	93% ±3	According to model	Automatic

MEDICAL AIR COMPRESSOR

Clean and stable medical air supply.

- Oil-free and clean air supply
- Stable pressure and high reliability
- Low noise and low vibration
- Suitable for hospitals, clinics and laboratories

Type	Gas	Capacity	Operation
Medical Air Compresser	Medical Air	According to model	Automatic

MEDICAL GAS CYLINDER FILLING SYSTEM

Safe and efficient cylinder filling.

- For oxygen, medical air, nitrous oxide, etc.
- Safe and efficient filling process
- Multiple filling positions
- Suitable for hospitals and gas supply centres

Type	Applicable Gas	Filling Positions	Operation
Cylinder Filling System	O_2 / Air / N_2O (according to model)	According to model	Automatic

MEDICAL GAS STORAGE TANK

Safe storage for continuous supply.

- High safety and durable design
- Suitable for oxygen, air, vacuum and other gases
- Various capacities available
- Complies with international standards

Type	Gas	Capacity	Installation
Storage Tank	O_2 / Air / Vacuum	According to model	Ground or indoor

GAS PURIFICATION SYSTEM

Clean and high-quality medical gases.

- Removes moisture, oil and impurities
- Improves gas quality and equipment lifespan
- Stable and efficient operation
- Suitable for complete medical gas systems

Type	Function	Applicable Gas	Operation
Purification System	Filtration and drying	O_2 / Air / Vacuum	Automatic

TURNKEY SOLUTIONS

From design to installation.

- Complete medical gas solutions
- Design, installation and commissioning
- Technical support and training
- Adapted to the needs of each project

Type	Service	Applicable Gas	Project
Turnkey Solution	Design + Installation	O_2 / Air / Vacuum / N_2O	Hospitals, Clinics, Projects

Reliable solutions for a healthier tomorrow.

7. SPECIALIZED EQUIPMENT

DIAGNOSTIC EQUIPMENT

Accurate diagnosis for better care.

Advanced diagnostic equipment to support early detection, precise evaluation and efficient treatment in hospitals, clinics and healthcare facilities.

CT SCANNER

High-resolution imaging for precise diagnosis.

- High image quality and fast scanning
- Advanced reconstruction technology
- User-friendly operation
- Suitable for hospitals and diagnostic centres

Type	Application	Configuration
CT Scanner	Radiology / General Imaging	According to model

ULTRASOUND SYSTEM

Versatile and reliable imaging.

- High image resolution
- Multiple probes and applications
- Suitable for abdominal, cardiac, obstetric, vascular and musculoskeletal use
- Compact and ergonomic design

Type	Application	Configuration
Ultrasound System	Multi-specialty Imaging	According to model

DIGITAL X-RAY SYSTEM

Efficient, low-dose and high-quality imaging.

- High image quality with low radiation dose
- Digital workflow and fast processing
- Suitable for general radiography applications
- Flexible configurations for different facilities

Type	Application	Configuration
Digital X-Ray System	General Radiography	According to model

MAMMOGRAPHY SYSTEM

Early detection, greater possibilities.

- High-resolution digital imaging
- Comfortable and safe examination
- Advanced image processing
- Suitable for screening and diagnostic use

Type	Application	Configuration
Mammography System	Breast Imaging	According to model

MULTI-PARAMETER MONITOR

Reliable monitoring at every moment.

- Monitors ECG, SpO_2, NIBP, respiration and temperature
- Clear and user-friendly display

7. SPECIALIZED EQUIPMENT

SURGICAL EQUIPMENT

Precision, safety and control in every procedure.

Advanced surgical equipment designed to support healthcare professionals in a wide range of procedures, from routine surgery to highly specialised interventions.

SURGICAL LIGHT

High performance illumination for greater precision.

- High-intensity, shadowless LED illumination
- Adjustable light intensity and colour temperature
- Ergonomic and flexible positioning
- Suitable for operating rooms and procedure rooms

Type	Application	Configuration
Surgical Light	General and specialised surgery	Ceiling or mobile

SURGICAL TABLE

Versatile, stable and patient-focused design.

- Multi-position and fully adjustable
- Radiolucent tabletop (optional)
- Suitable for a wide range of surgical specialties
- Safe, stable and easy to operate

Type	Application	Configuration
Surgical Table	General and specialised surgery	Electric / Hydraulic According to model

SURGICAL PENDANT

Integrated solutions for a safer and organised work environment.

- Supply of medical gases, electrical and data outlets
- Modular and ergonomic design
- Improves workflow and safety
- Customised configurations available

Type	Application	Configuration
Surgical Pendant	Operating Room	Ceiling mounted According to model

ELECTROSURGICAL UNIT

Reliable performance for different surgical procedures.

- Monopolar and bipolar modes
- Versatile for a wide range of surgical procedures
- User-friendly interface and safety features
- Suitable for hospitals, clinics and surgical centres

Type	Application	Configuration
Electrosurgical Unit	General and specialised surgery	According to model

ANESTHESIA WORKSTATION

Advanced ventilation for safer anesthesia.

- Reliable and precise ventilation
- Integrated monitoring and safety systems
- User-friendly and ergonomic design
- Suitable for operating rooms and critical care areas

Type	Application	Configuration
Anesthesia Workstation	Surgery / ICU	According to model

ENDOSCOPIC SYSTEM

High-definition imaging for minimally invasive surgery.

- High-definition image quality
- Wide range of endoscopes and cameras
- Suitable for laparoscopic and arthroscopic procedures
- Compatible with different specialties

Type	Application	Configuration
Endoscopic System	Minimally invasive surgery	HD / 4K According to model

Better surgery. Healthier lives.

7. SPECIALIZED EQUIPMENT

SURGICAL EQUIPMENT

Precision, safety and efficiency in every procedure.

A range of advanced surgical equipment designed to support healthcare professionals in operating theatres, day surgery centres and specialized clinics.

OPERATING TABLE

Flexible, reliable and patient-friendly.

- Multiple positioning options
- Electric and hydraulic models
- High stability and load capacity
- Suitable for general and specialized surgery

Type	Application	Configuration
Operating Table	Operating Room	According to model

SURGICAL LIGHT

Optimal visibility for greater precision.

- High intensity LED illumination
- Adjustable light field and colour temperature
- Low heat emission
- Ceiling or mobile configuration

Type	Application	Configuration
Surgical Light	Operating Room	Ceiling / Mobile According to model

ANESTHESIA WORKSTATION

Safe and precise anaesthesia delivery.

- Advanced ventilation modes
- Integrated monitoring and safety systems
- User-friendly interface
- Suitable for adult, paediatric and neonatal use

Type	Application	Configuration
Anaesthesia Workstation	Operating Room	According to model

ELECTROSURGICAL UNIT

Precision and control in every procedure.

- Monopolar and bipolar modes
- Wide range of surgical applications
- Safe and efficient performance
- Compatible with various accessories

Type	Application	Configuration
Electrosurgical Unit	Surgery	According to model

PATIENT WARMING SYSTEM

Thermal care for better outcomes.

- Maintains patient temperature
- Reduces risk of hypothermia
- Adjustable temperature and airflow
- Disposable or reusable blankets

Type	Application	Configuration
Patient Warmer	Operating Room	According to model

SUCTION UNIT

Powerful and reliable suction.

- High suction power
- Low noise operation
- Easy to use and maintain
- Suitable for operating room, ICU and emergency use

Type	Application	Configuration
Suction Unit	Surgery / ICU / Emergency	According to model

Reliable equipment. Safer procedures.

MERCADERES DE ARCADIA
MEDICAL SUPPLIES
FOR A HEALTHIER TOMORROW

HOW WE WORK

Flexible supply. Tailored quotations.

FLEXIBLE ORDER QUANTITIES

Order quantities are evaluated according to the product, manufacturer and project requirements.

TAILORED QUOTATIONS

We do not publish fixed catalogue prices. Each enquiry is quoted according to quantities, specifications, destination and logistics requirements.

MIXED & PROJECT ORDERS

Mixed orders and project-based supply solutions may be available depending on the selected products and manufacturer.

REQUEST YOUR QUOTATION

Tell us what you need, the estimated quantity and destination.
Mercaderes de Arcadia will prepare a tailored commercial proposal.

NO FIXED UNIVERSAL MOQ OR MAXIMUM QUANTITY

Conditions are confirmed individually for each product and project.
